

## Diving deeper into color- make a chart

Color is Hue (green, red, blue,) Value(light or dark,) Intensity (bright or dull) Intensity is perhaps the one we talk about least. Because our pencils do not give us many hints as to what the color is composed of, we need to test them out to see the intensity of a color or the lack of it. Here is a chart to play with any color pencils. Choose comparable ones from the different brands

	Prismacolor			Faber-Castell or Pablo
